2. LETTER FROM CHAIRMAN

19 March 2010

Dear Investor

On behalf of the Directors of Facilitate Digital Holdings Limited ("FAC"), I invite you to consider the offer of Shares as set out in this rights issue.

The offer to you is for 1 new share for every 12 shares that you presently have, at a price of \$0.08 for each new share that you subscribe for. This rights issue is being fully underwritten by certain of the directors and their associated entities. Key dates for receipt of subscriptions and completion of the offer are set out in the offer document.

It is proposed to raise approximately \$750,000, less offer expenses, by this rights issue. The funds raised will be used to support implementation projects with major clients in the US, Europe and Asia Pacific area, and to provide a capital buffer over the short to medium term. It is also noteworthy that the Company is successfully diversifying its revenues offshore with already 60 per cent from outside Australia.

In the recent financial report for the December 2009 half year, the Company reported a growing sales pipeline with a number of significant media agencies. It is our view that interest will continue to grow and that the next 12 months or so will be important in developing a beach-head with major global media agencies. Although the Company has cash reserves, we do not want opportunities to be compromised by any cash constraint.

Notwithstanding this, the Company remains committed to building on the financial improvements of the December 2009 half year which saw a \$612,000 EBITDA result - a substantial turnaround on the prior corresponding period. The Company is hopeful of achieving a further improvement in EBITDA in the current half year and is targeting a break-even overall profit. It is particularly pleasing that the Company has been able to significantly improve financial performance in the face of adverse currency movements and, of course, a difficult overall global economy.

Given the Company's emerging growth status, it is difficult to accurately forecast the future level of revenues and profit. However, it is our expectation that next financial year will reflect the results of implementation of the sales pipeline with revenue in the order of \$9.5m which should be an increase of more than 20 per cent over FY10. Depending in part on currency movements, this should translate into a NPBT in the range of \$500,000 to \$1,000,000.

The Board believes that it is also prudent to have a stronger liquidity position given the prospect of further currency volatility in key markets such as Europe, UK and US. As mentioned, the Company has had a number of client successes in recent times. These include:

- GroupM APAC
- OMD Australia
- GroupM Austria
- OMD APAC

The information in this Rights Issue is very important and should be read in detail. We believe that the prospects for FAC are encouraging, but any investment of this nature should be considered as speculative. Shareholders should seek their own independent investment advice on this Rights Offer.

On behalf of the Directors, I look forward to welcoming your subscriptions under the terms of this Rights Issue.

Sincerely

Stuart Simson
Chairman

This Offer Document does not purport to contain all the information that you may require to evaluate a possible application for New Shares.

5.9 Optionholders

Existing Optionholders will not be entitled to participate in the Offer unless they:

- have become entitled to exercise their existing options under the terms of their issue and have been issued Shares prior to the Record Date; and
- are eligible to participate in the Offer as a result of being a holder of Shares on the Record Date and otherwise satisfying the eligibility requirements, and then only may participate to the extent of their shareholding, not their option-holding.

5.10 CHESS

The Company participates in the Clearing House Electronic Subregister System, known as CHESS. ASX Settlement and Transfer Corporation Pty Ltd ACN 008 504 532 (**ASTC**), a wholly owned subsidiary of ASX, operates CHESS in accordance with the Listing Rules and ASTC Settlement Rules.

Under CHESS, Applicants will not receive a certificate but will receive a statement of their holding of New Shares.

If you are registered in the Issuer Sponsored Subregister, your statement will be despatched by Link Market Services Pty Ltd and will contain the number of New Shares issued to you under this Offer Document and your security holder reference number.

A CHESS statement or issuer sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their holding changes.

6. RISK FACTORS

An investment in New Shares should be regarded as speculative and is a decision which is subject to the same type of risks which are ordinarily associated with purchasing company shares in ASX listed companies.

The brief summary of risk factors set out below is not exhaustive.

Eligible Shareholders should consider these risks carefully and, if they are in any doubt, should consult their financial, legal or other professional adviser.

6.1 General risk factors

As is the case with any investment listed on ASX, the value of New Shares may rise above or fall below the Issue Price. Movement in the Company's share price may be attributable to any number of factors associated with financial and operating conditions. Similarly, external factors may have bearing on the value of New Shares, over which the Company has no control.

These external factors include (but are not limited to):

- economic conditions in Australia and overseas;
- share market fluctuations;
- interest and inflation rates;
- changes in investor sentiment toward particular market sectors;
- the demand for, and supply of, capital;
- liquidity of Shares and the lack of an active market for Shares;
- changes in fiscal, monetary, regulatory and other government policies;
- geo-political conditions such as acts or threats of terrorism or military conflicts; and
- any future changes to tax laws or accounting standards.

6.2 Key personnel

The Company's success depends to a significant extent upon its key management personnel as well as other management and technical personnel. The loss of services of any such personnel could have a material adverse effect on the Company and its share price.

6.3 Liquidity risk

There can be no guarantee that there will continue to be an active market for Shares. There may be relatively few buyers or sellers of Shares on ASX at any given time, particularly as some of the Directors hold substantial shareholdings in the Company. This may affect the volatility of the market price of Shares and the prevailing price at which Shareholders will be able to sell their Shares. This may result in Shareholders receiving a market price for their Shares which is less or more than the price paid for the New Shares.

6.4 Capital funding risk

In order to achieve growth and invest in further technology, the Company may need additional equity or debt in the future. There is no assurance that the Company will be able to raise such funding when

it is required or that the terms associated with the provision of such capital will be satisfactory to the Company.

6.5 Intellectual property risk

The Company relies heavily on its intellectual property (**IP**). Successful exploitation of its research and development program depends upon the Company being able to secure its IP and/or defend challenges to its IP from third parties.

6.6 Investment risk

An investment in New Shares is a speculative investment. New Shares carry no guarantee in relation to the payment of dividends, returns of capital or market value on those New Shares.

6.7 Technology risk

The Company operates in an industry that relies on accurate and innovative products. Technology changes occur rapidly. There is a risk that the products offered by the Company may become technically inferior to other products in the market. The Company must continually update its products to remain competitive. Failure to do so will have a material adverse impact on the Company.

6.8 Law, regulatory and policy risk

Changes in government legislation, regulation and policy in jurisdictions in which the Company operates may adversely affect the operations of the Company, future earnings of the Company, the timing of revenues and the market value of Shares quoted on the ASX.

6.9 International business

The Company operates in several countries around the world. The Company's reporting currency is Australian dollars. The Company's global operations give rise to an exposure to changes in foreign exchange rates as revenue from countries other than Australia are denominated in currencies other than Australian dollars. As such, changes in exchange rates, restrictions on repatriation of earnings and changes in a specific country or region's political or economic conditions could adversely affect the Company's profitability and financial position.
